

Christian Colewan

WEB DEVELOPER

I'm a web developer with knowledge of Laravel and Vue.js, as well as Vuetify, Bootstrap, and Material Design for the front end. I can create web designs using PHP, JavaScript, HTML, and CSS. I have background in database management using MySQL and PGSQL. I have also experienced deploying websites using online hosting sites such as Hostinger, Netlify and GoDaddy. I have used GitHub, Bitbucket for my repositories. I have also some knowledge in Git for the version control of my projects. As for my projects, I have created inventory systems, an e-commerce mobile app, and management systems.
